

## Agarbatties

### NO ENTRY MOSQ STICKS®

*Organic, eco-friendly, safe and exported across 5 countries*

One of its unique kinds in the market which is highly organic, eco-friendly and safe is our Brand "**No Entry®**" that was innovated after thorough research by our team of analysts and entomologists in the year 2001 to drive away mosquitoes entering homes and office premises. It has been our hot selling brand that contains **Neem oil, Eucalyptus oil, TT Loban Citronella oil and Jawa along with the fragrance of Musk.**

The threat of various diseases such as dengue, malaria, chikungunya has increased over the recent years, raising the death toll of humans. "No Entry®" ceases the predicament caused by mosquitoes.

The superior technology used **exterminates the mosquitoes within 3 minutes** from the time of application. It is highly effective in killing the mosquitoes and minimizing the spread of breeding, biting and probability of epidemics. It is economical and can be conveniently used at any desired time.

No Entry® is as much an urban brand, as a rural solution.

### TRISHUL® COCKROACH AGARBATTIES

Our first pest control product and one of the most successful innovations up to date in the pest control sector, Trishul Agarbatties are highly economical and has an ease of usage. Pioneered by our Chairman to embark a whole new era of pest control products Trishul Agarbatties with its unique concept and was welcomed overwhelmingly. It is highly economic and can be conveniently used in houses, commercial sectors, etc.

#### MODE OF ACTION

The ignited smoke from the agarbatti produces heat which vaporizes the pesticide that rises to the ceiling. From here it spreads to every nook and corner of the room dispersing the pesticide in a uniform manner affecting the insects that come in contact with it in a clean and cost effective way.

#### DIRECTION OF USE

First make sure that all the ventilation and openings in the room except the one through which the operator has to exit is sealed property. Place the required amount of agarbatties in the room.

Ignite the stick and after ensuring that smoke is coming out of the battie, exit the room and seal the exit properly to avoid smoke from escaping. Keep the room closed for about 3-4 hours. Open all the doors and windows of the room after the required time.
