TAARGET® RAT NIL PASTE

Taarget Rat Nil Paste is a super effective ready to use rat paste manufacture by Master Industries. This rat killer is fast acting anti-rodent paste available in handy soft tube for household use. Make sure the product is inaccessible by children. It is one of our popular ranges of rodenticides.

MODE OF ACTION

The Rodenticide when ingested acts as a stomach poison and kills the rat.

DIRECTION OF USE

To ensure best results, the rats should be first induced to eat plain food like pieces of bread, coconut or other dry food kept about the premises frequented by rats. In the next right place the same type of food pieces applied with Rat Nil is thinly spread on them. Once the Rats consume them, they will die instantly.

If any rats are left, repeat the procedure after 2 or 3 days by changing the food.

ADVANTAGES

The best feature of Rat Nil Paste is the speed of results (Rats die in 2-3 hours). Due to a fruit base, the paste acts as an attractant. Less chances of Resistance development. Soft, re-sealable lami-tubes make it easy to use even on difficult areas like Roof beams and tree-tops.
