

## Rat Pads, Cakes and Granules

### MASTER CATCH® RAT GLUE TRAPS/ PADS

Master Catch® is our latest innovation in the eco-pest control range of products to reduce the menace of rats. It is a non hazardous and environment friendly product which is available in the form of a glue pad. The alluring flavor of peanut butter which is present in the glue pad attracts the rats easily. It can be used for domestic purposes and in areas where the infestation is observed.

This open and shut solution from Master Industries is introduced to help you get rid of rats and mice conveniently. Our main aim is to make your dwelling pest-free.

#### DIRECTION OF USE

Master Catch® is a unique rat trap that looks like a book and opens like one. Once opened, you can find inside two special glue surfaces separated by spacers to stop them from sticking to each other. These surfaces are extremely sticky. Rats and Mice are creatures of habit - they tend to follow a fixed route along walls and corners and they don't walk - they scamper. So its easy to trap them using Master Catch.

#### ADVANTAGES

- The rodent gets trapped on the board and can then be disposed.
- It is easy to use and economical
- Eco friendly and Non Toxic Rat and Mouse Trap

**Eco Big Pads - 85/-**

**Packed in - 100 pcs / carton**

### TAARGET® RAT NIL CAKE

Taarget Rat Nil Cake is a ready to use single dose powerful rodenticide containing 0.005% bromodiolone chemical. It doesn't have bait shyness and is not hazardous to environment. It interferes with the blood-clotting mechanism, which results in fatal internal hemorrhages causing death of the rodent.

Recommended for houses with pets, areas with high moisture and low infestation.

#### RECOMMENDED FOR

Houses with Pets, areas with high moisture, Low infestation

#### MODE OF ACTION

The Rodenticide when ingested reduces the clotting capacity of the blood of the rodent. The rats die gradually due to internal hemorrhage.

#### DIRECTION OF USE

The path usually taken by rats to enter and leave your house is the ideal for placement. Break the block into small cubes. Keep one to two cubes at appropriate intervals according to the degree of infestation. Collect and dispose off the rodent and left over bait properly and repeat dosage if infestation is high. To prevent re-infestation with rodents, limit sources of leftover food, water and harborage as much as possible.

#### ADVANTAGES

The best feature of Rat Nil cake is that rats usually tend to die away from your house, in the open. It is safe for non-target animals and pets.

**Eco Small Cake - 10/-**

**Packed in - 100 Dozens / carton**

### TAARGET® RAT GRANULES

Out of the multiple products innovated and manufactured by Master Industries, Taarget Rat Granules is an super effective rat killer prepared with wheat coated zinc phosphide.

#### MODE OF ACTION

The zinc phosphide, when ingested by the rat, reaches the stomach, reacts with the acid present there and releases the poisonous phosphines. Gradually, this gas is absorbed into the rats blood, thus killing it.

#### DIRECTION OF USE

Identify areas where rats are frequently seen and place the bait in shallow trays away from the access of children and pets. In case of Rat burrows, bait is applied directly at the mouth of the burrow. Dispose off dead rodents and left over bait properly. Change area of applications in case of repeated infestation.

#### ADVANTAGES

- Taarget Rat Granules is the most economical ready to use rodenticide in the market.
- It is most effective in case of massive infestation.
- There is no preparation time required, this is convenient to use.
